# SAIC and RF Controls To Demonstrate Innovative Technologies at IEEE RFID 2011

## Companies collaborate to create ITCS®-based solutions for customers across multiple industries

(McLean, Va.) March 29, 2011-- Science Applications International Corporation (SAIC) [NYSE: SAI] and RF Controls, LLC will demonstrate SAIC's Asset Management Suite (AMS) and RF Controls' Intelligent Tracking and Control System (ITCS®) during a special session at the 5<sup>th</sup> Annual IEEE International Conference on RFID April 12 at the Orange County Convention Center in Orlando, Fla.

AMS, a web-based asset tracking and management application, offers companies better visibility into their inventory, and enables increased asset utilization. The highly-configurable and scalable system employs the latest Radio-Frequency Identification (RFID) technology to directly monitor and manage physical assets in real-time. AMS RFID-enabled asset tracking and supply chain management solutions can help improve the accuracy, security and utilization of a company's mobile and fixed inventory assets.

Patent-Pending ITCS is based on sophisticated military tracking technology and "smart antennas," providing real time, 3-D location of items that have been tagged with inexpensive, passive UHF (ultra-high frequency) RFID tags. ITCS can accurately locate a specified tag within feet and reliably report direction of movement. The innovative combination of features in ITCS enables end-users to address latent business process

issues and enhance process efficiency. ITCS products are fully compliant with Federal Communications Commission (FCC), Underwriters Laboratory (UL), CE Mark (CE) and Restriction of Hazardous Substances Directive (RoHS) regulations.

SAIC and RF Controls collaborated to create ITCS-based solutions, putting forth a full-service offering to customers across multiple industries.

“We’re excited to demonstrate how the integrated AMS and ITCS solutions will bring potential value to multiple applications and industries,” said Doug Litten, SAIC assistant vice president of RFID solutions. “This technology offers customers an asset tracking application combined with the powerful RTLS capabilities of ITCS.”

“RF Controls is delighted to demonstrate these collaborative solutions with SAIC at the IEEE RFID event, and to provide applications context for our innovative technology,” added Chris Hook, RF Controls vice president of business development.
